Introduction

About this report

The 2021 census provides intelligence about the size of Brent's different ethnic group populations. Analysis of headline data for Brent was recently summarised in a census topic report: [Ethnicity in Brent](#). To complement that report, this census atlas provides a set of maps detailing the size of the different ethnic group populations at small area level across Brent. The maps show the percentage of the population belonging to different ethnic groups across Brent's 181 Lower layer Super Output Areas (LSOAs). Figures are also shown for the borough's 22 ward areas in chart form alongside each map. The appendix provides additional data tables at ward level, which show both population counts and rates by ward. All data used to underpin the maps, charts and tables in this report is also available in spreadsheet format, and has been published alongside this report, on the council's open data site.

About the data

- LSOA data: LSOAs (Lower layer Super Output Areas) are statistical areas used by the Office for National Statistics (ONS). There are 181 LSOAs in Brent, with an average population of 1,877. LSOA census figures presented here (and totals for Brent) have been sourced directly from the ONS (via the [NOMIS](#) website).
- Ward estimates: [Ward figures](#) presented here were produced by the Greater London Authority (GLA), based on census counts at output area level from the ONS. Where output areas are split over ward boundaries, data were apportioned to each ward based on the number of residential addresses in each area. The GLA's ward estimates differ slightly from published ONS ward figures, which were modelled using a different 'best-fit' methodology.
- Copyright: ONS census statistics are licenced under the Open Government Licence v.3.0 © Crown Copyright. Ward estimates in this report were created by the GLA Census Information Scheme using base data from the ONS licenced under the Open Government Licence v.3.0.
- Pandemic impacts: The 2021 census took place in March 2021 when a range of pandemic lockdown restrictions were still in place. It is likely that some residents were temporarily away at this time (e.g. students, furloughed and migrant workers). While some will still have been captured on the census at their usual address, others will not have been. Census results need to be viewed in this context: as a snapshot of the population as at March 2021.

Ethnicity classification

The maps profile the ethnic group populations as captured on the census form. The 2021 question asked: 'What is your ethnic group?'. The answer categories comprised 19 different ethnic groups, which were nested under 5 broader 'high level' headings, reflecting the two stage framing of the question. The maps that follow show data for the main ethnic groups (except the 'Gypsy or Irish Traveller' group which was quite small in size, numbering just 237 across Brent). Also mapped are totals for all 'White minority groups' and all 'Black, Asian and minority ethnic groups' together. The Appendix tables provide more detail by ward, including data for the 5 'high level' groups.
